Expected Outcomes: Understanding relationship of exercise & health

Graduates will be familiar with a wide basic content information as it relates to exercise and health. Graduates will have a basic understanding of research concepts in health and physical activity.

Related typical general education outcomes:

1. Information Literacy
2. Ability to Solve Open-Ended Problems
3. Scientific Literacy

Assessment methods

Method: Completion of degree program

All graduates will complete and pass all courses on the PAH degree program

Findings:

25 students completed and passed all courses between 2011-12. Graduates rating knowledge and skills as a 6 and courses as a 6.67

How did you use findings for improvement?

We continue to focus on expanding content knowledge and applying it to clincial and community settings.

Additional comments:

None

Method: Internship

Graduates will complete an internship that demonstrates their knowledge and ability to use knowledge in an applied setting

Findings:

25 students completed the internship. Graduates were evaluated as favorable in their content knowledge and skill application.

How did you use findings for improvement?

A variety of internships have been added over the past year to accomadate all students. Assessments will continue to evaluate student progress.

Additional comments:

None

Expected Outcomes: Research health and physical activity

Graduates will have a basic understanding of research concepts in health and physical activity.
Related typical general education outcomes:

1. Information Literacy
6. Ability to Solve Open-Ended Problems
11. Scientific Literacy

Assessment methods

Method: Completion of degree program

All graduates will complete and pass all courses on the PAH degree program

Findings:

25 students completed and passed all courses between 2011-12. Graduates rating knowledge and skills as a 6 and courses as a 6.67. Also, two undergraduate students were part of presentations at a regional conference.

How did you use findings for improvement?

We will continue to provide courses that address this specific outcome. Students will be encouraged to attend regional and national conferences.

Additional comments:

None

Method: Internship

Graduates will complete an internship that demonstrates their knowledge and ability to use knowledge in an applied setting

Findings:

25 students completed the internship. Graduates were evaluated as favorable in their content knowledge and skill application.

How did you use findings for improvement?

A variety of internships have been added over the past year to accommodate all students. Several of these internships are research based assistantships.

Additional comments:

None
