Expected Outcomes: Knowledge

Graduates of the MEd and the MS programs will exhibit advanced knowledge as it relates to exercise, health and physical activity.

Assessment methods

Method: Course Completion

Students are required to complete core courses: KINE 6500, 6550, 6400 and 7780. Each of these courses requires: oral presentation, written communication and mastery of content knowledge.

Findings:

7 students completed the degree program.

How did you use findings for improvement?

No action is required at this time

Additional comments:

None

Method: Research assessment

The 7780 course requires students to develop a research proposal. In addition, we measure how many of our masters students present at regional and national conferences.

Findings:

7 students who graduated successfully completed 7780 and 2 students presented at regional and national conferences.

How did you use findings for improvement?

Strategies to improve masters level research has been implemented. Research courses are being offered in the summer that allow for students to participate in research with a faculty member.

Additional comments:

None

Expected Outcomes: Research

Graduates of the MS program will be able to design, implement, analyze and report on a research project.
