Expected Outcomes: Advanced Musical Knowledge

Graduates will gain advanced knowledge in a variety of areas in the musical domain. They will continue to maintain a 3 or above on final masters assessments (including comprehensive exams and comprehensive projects, specifically music knowledge related questions/projects).

Assessment methods

Method: Comprehensive Exams/Projects

Students will continue to maintain a 3 or higher on final masters assessments (including comprehensive exams and comprehensive projects, specifically music knowledge related questions/projects).

Findings:

Students continue to maintain a 3 or higher on final masters assessments (including comprehensive exams and comprehensive projects).

How did you use findings for improvement?

Students continue to maintain a 3 or higher on their comprehensive exams, Professional Work Sample, and the Graduate Inventory of Candidate Proficiencies. In recent year(s) all have maintained scores of 3 (competent) or higher.

Additional comments:

The College of Education is moving to new assessments. We expect our students will continue to be at least competent on these assessments, in addition to the comprehensive exams/projects.

Method: Improve Authenticity of Comprehensive Assessment

Students will complete a graduate comprehensive exam (with 3 questions) or complete a graduate comprehensive project (consisting of 3 projects to be completed over 3-7 weeks).

Findings:

Students continue to maintain a 3 or higher on their comprehensive exams.

How did you use findings for improvement?

During fall and/or early spring semester, the music education advisory committee will meet (met) to discuss adding a comprehensive final project approach to the final assessment for music education masters students. Using a more practical approach will help students solidify extensive conceptual information.

Additional comments:

Pending faculty/program/departmental support, masters students will begin completing final comprehensive projects that will include three main areas in music and music education, as requested by each student’s faculty committee.
Expected Outcomes: Advanced Music Education Knowledge

Graduates will gain advanced knowledge in how P-12 students learn music. They will continue to maintain 3 or above on final masters assessments (including comprehensive exams and comprehensive projects, specifically music education questions/projects).
