Expected Outcomes: demonstrate advanced knowledge

Students will demonstrate advanced knowledge in the integration of all four areas of curriculum, teaching, child development and assessment of learners and programs

Assessment methods

Method: Comprehensive Exam

90% will pass (score of 75% or higher) both components, 60% will score 85% or above.

Findings:

We only had two masters students during this time period. Both of them passed (100%), and one (50%) scored above 85%. Thus, we did not meet this goal.

How did you use findings for improvement?

none

Additional comments:

Because we only had two students, the findings are not really indicative of the outcome. Statistically the data do not lend themselves to significance.

Expected Outcomes: achieve the advanced certification

Students will achieve the advanced certification (Class A) offered by the ALSDE

Assessment methods

Method: Major Field Test or Licensure Exam

95% of students will complete ASDE certification requirements Class A certification

Findings:

All of the two students completed Class A certification.

How did you use findings for improvement?

none

Additional comments:

None

Expected Outcomes: professional development

On completion of the master's program, students will have engaged in professional development

Assessment methods

Method: Professional development activity
75% of students will attend at least one professional development opportunity (e.g. workshop or conference). 25% of students will present at workshops or conferences.

Findings:

Neither of the two students attended a conference. This goal was not met.

How did you use findings for improvement?

We will engage the students in projects and facilitate their attendance and presentations at professional conferences.

Additional comments:

None
