Expected Outcomes: Recruitment

Recruitment efforts will be conducted in an attempt to stimulate at least 750 applications annually, with specific efforts made to recruit minority students.

Assessment methods

Method: Admissions data

Admissions data will be reviewed annually.

Findings:
For the 2011-2012 admissions cycle (class of 2016), the total number of applications received was 607. Of these, 110 applicants identified themselves with a minority population. Note: This does not include 149 applicants who identified themselves as Asians – Asians are no longer considered an underrepresented minority.

How did you use findings for improvement?
None

Additional comments:
None

Expected Outcomes: Admissions

Each August, the school will execute the matriculation into the Doctor of Pharmacy program of between 145 and 150 student pharmacists who have completed all prerequisite courses with satisfactory grades, acceptable PCAT scores, and satisfactory interview scores.

Assessment methods

Method: Admissions and matriculation data

Admissions and matriculation data will be reviewed annually.

Findings:
For the 2011-2012 admissions cycle (class of 2016), the school matriculated 148 student pharmacists.

None

Expected Outcomes: Supplemental Instruction

The school will offer multiple sections of peer-led Supplemental Instruction for each of the courses that
have tended to yield a notable number of grades below C. Of the student pharmacists using this service, at least 80% of survey respondents will grade the service as Effective or Very Effective.

Assessment methods

**Method**: Supplemental Instruction records and survey data
Supplemental Instruction records will be reviewed semesterly. A formal student satisfaction survey will be conducted.

**Findings**:
During 2012, the school offered at least three sections of Supplemental Instruction for each of these target courses. In the Fall 2012 survey, 65% of respondents graded the service as Effective or Very Effective.

None

**Additional comments**:
None

**Expected Outcomes**: Retention, advancement, and graduation

The school’s retention rate for first year student pharmacists will be at least 95% and at least 95% of each class will advance to the second professional year. At least 90% of each admitted class will graduate in four years; at least 85% will graduate in five years.

Assessment methods

**Method**: Enrollment data
Enrollment data will be reviewed annually.

**Findings**:
For the Class entering Fall Semester 2011, 99.3% were retained after one year with 94.6% advancing to the second professional year and 4.7% repeating portions of the first professional year. For the Class entering Fall Semester 2008, 81.8% graduated in May 2012, with an additional 12.8% remaining in the HSOP with graduation scheduled for May 2012 (total retention was 94.6%)

**How did you use findings for improvement?**

**Additional comments**:
None

**Expected Outcomes**: Student Pharmacist Organizations

The school will sponsor a chapter of at least eight national professional organizations and honorary societies for student pharmacists. Each organization will have at least one (and preferably more) faculty advisor.

Assessment methods
Method: Student pharmacist organization data

Student organization data will be reviewed annually.

Findings:

For the 2011-2012 year, the school sponsored nine such organizations—two honorary societies and seven professional organizations. Each student organization maintained at least one faculty advisor. Most organizations maintained at least two advisors.
